Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is a lack of antecedent basis for the term "fixably slidable".

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-2, 15 and 25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1, 2, 15 and 25 are directed to or including within their scope a human being or portions thereof and are not considered to be patentable subject matter under 35 U.S.C. 101.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

And

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 3-5, 13, and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Crozet (WO 98/48738). Crozet discloses a spinal fusion device comprising: a U-shaped titanium support with serrated surfaces that can connect to an associated support (Fig. 40).

Claims 3-8, 13-14, 16, 18, 23-24 and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Boyd et al. (6,468,311). Boyd et al. discloses a spinal fusion device comprising: a fusion support made of bone having a slidable cross member with serrated surfaces that can connect to an associated support (Fig. 7). Please note that the cross-member is interchangeable with others of different length and therefore can be "configured in different lengths.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-12 and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Crozet (WO 98/48738) in view of Foley et al. (6,395,031). Crozet discloses a spinal fusion device comprising: a U-shaped titanium support with serrated

Art Unit: 3738

surfaces that can connect to an associated support however Crozet fails to disclose the cross member fixably slidable. Foley et al. teaches an intervertebral cage comprising a cross-member that is fixably slidable (e.g. Fig. 21) which allows for a reduced insertion size (column 1, lines 10-15). It would have been obvious to one of ordinary skill in the art to combine the teaching of an intervertebral cage comprising a cross-member that is fixably slidable, as taught by Foley et al., to a spinal fusion device as per Crozet, for a reduced insertion size.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas C. Barrett whose telephone number is (571) 272-4746. The examiner can normally be reached Tuesday-Friday between 9:00 A.M. and 6:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (571) 272-4754. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications.
